

# SuSy - efiport's Submission System

Writing a thesis is a critical milestone in completing a degree.

The thesis writing process has always been highly administrative – involving emails, calls, organisation, and negotiation for students, professors, and study advisors. This last hurdle before graduation can be painful...

...but it doesn't have to be!

What if you had an **intuitive-to-use online system** that streamlined the experience and empowered staff, faculty, and students to actively engage with the thesis process?

## What is SuSy?

SuSy is a thesis **Submission System** that enables everyone to **complete the entire thesis process online**. SuSy helps users **track deadlines, manage data, share information, and reduce administrative effort**. What's more, it offers the insight and data you need for quality management and accreditation.

## How students, faculty and staff benefit?

### Students

- Browse through **available thesis topics** or **propose your own** and find the right supervisor faster with SuSy.
- You **receive feedback** and responses from supervisors directly in the system.
- SuSy makes sure you always know where you are in the process and when deadlines are, so that you can focus on preparing your thesis!

### Faculty

- SuSy helps you **keep track** of your thesis supervisions and upcoming deadlines.
- All paperwork around thesis proposals and submissions is **organised in one place** and you can communicate directly with students from the system.
- You get **real time status updates** about new proposals coming in and always have an overview of your ongoing supervisions, upcoming deadlines, and overall capacity.

### Staff

- SuSy digitises the entire process and enables a **clear workflow and formal framework** for managing theses.
- This removes much of the manual administration and allows you to monitor everything in a single overview.
- You're always **up to date** about the current status of all projects, can contact students to follow up on open points, and can easily export results for archiving or accreditation purposes.
